

SkanSmart

Lateral Flow Reader

- Handheld
- Robust and user friendly
- Automated Quantitative Reader

Skannex offers the most elegant POC rapid test reader suited as well in your hand as on the lab bench. The reader can be adapted for almost any qualitative and quantitative rapid tests in the market. SkanSmart is a handy tool for doctor offices, emergency units, in-the field work and as a drug-of-abuse test station.

The Skannex solution is based on a patented barcode recognition system allowing the reader to extract test-information directly from the barcode labelled cassette. Easy to use. Human reading errors are avoided. Easy touch- screen-panel operated with big "Read Sample"- or "Incubate Read"- button. Reports are automatically transferred to email or server in a LIMS friendly format. Send results to Bluetooth printer for a receipt print.

SkanSmart is based on a smartphone. Benefits include all the smart features that come with such very well-known tool. The combination of the Skannex proprietary software and the SkanSmart interior design ensures excellent reproducibility and sensitivity. SkanSmart is delivered with an extra 2GB memory card which makes the storing capacity of results almost infinite.
